

A-VIEW Mobile

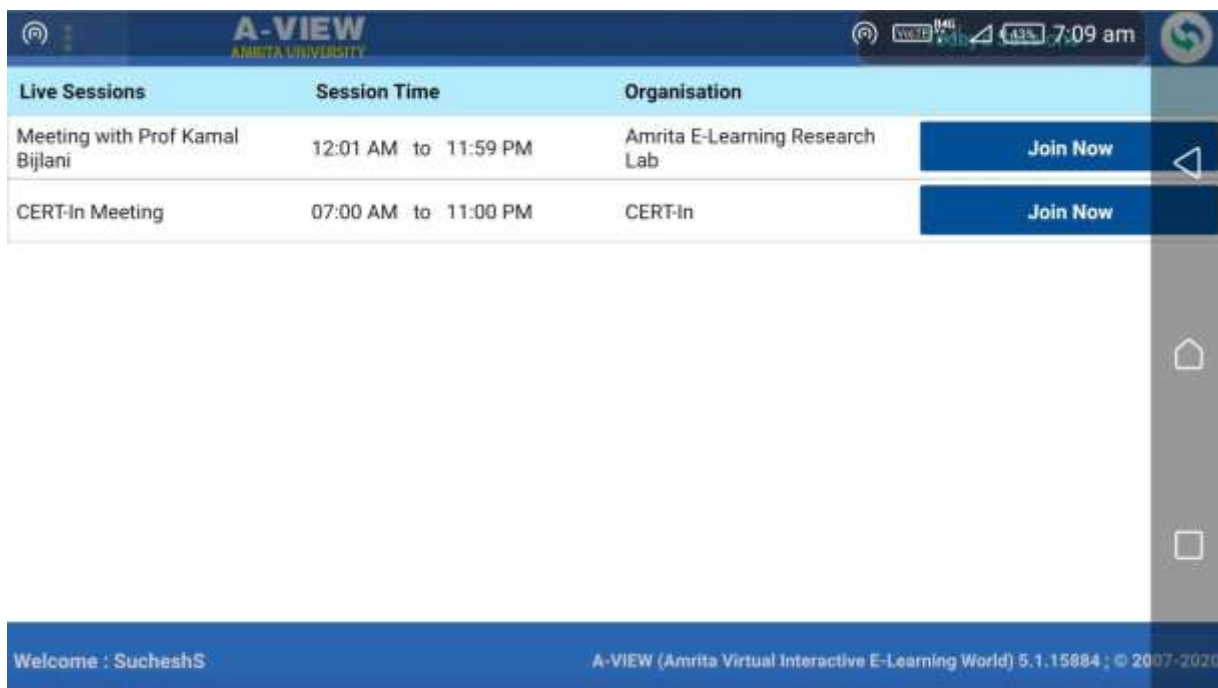

User Guide

Open A-VIEW app on your mobile and login with your username and password, if you are using this first time. Login credentials will be saved and you will be automatically logged in next time onwards, until you manually logout.

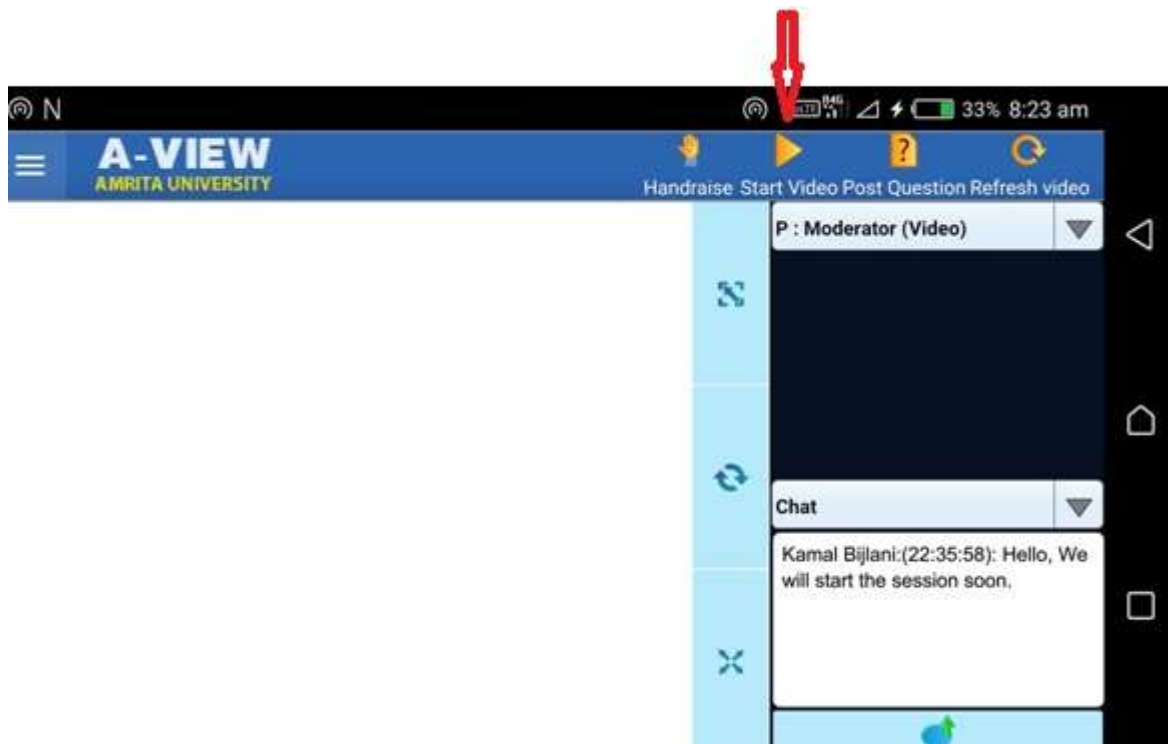

It will list upcoming/ongoing online sessions. Join the session that you would like to

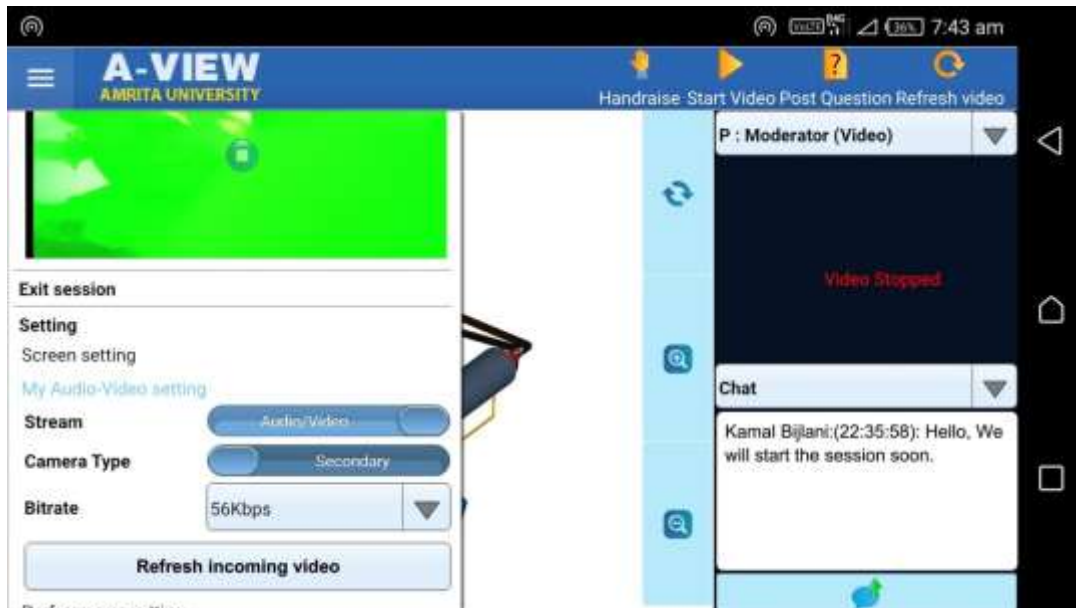

Presenter video and other shared content by the presenter will be visible to you real time.

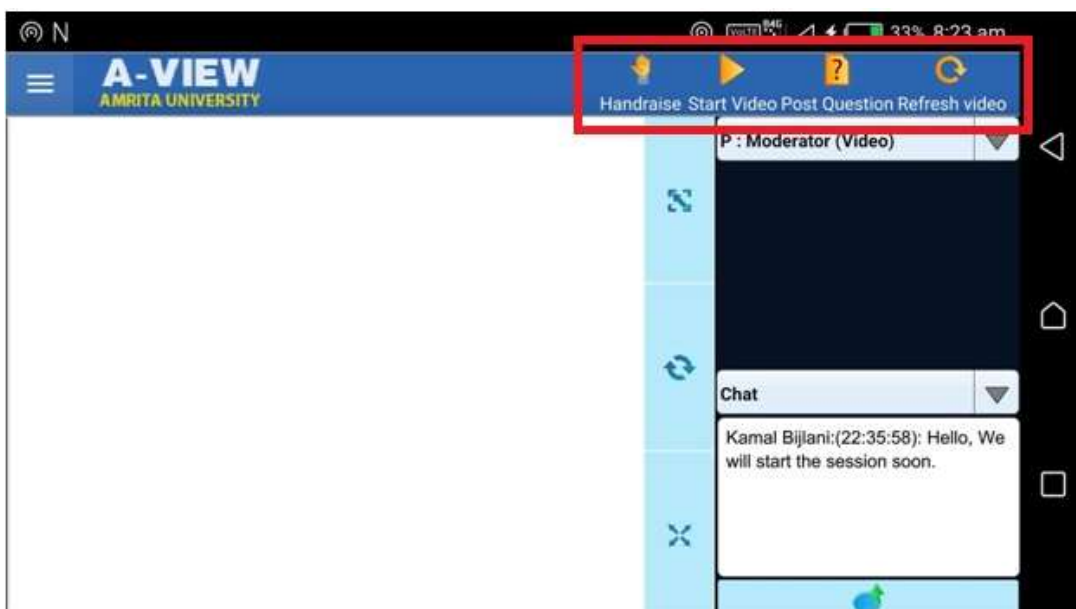

To interact with the presenter you need to start your video. Tap on 'Start Video' button (refer the below image).

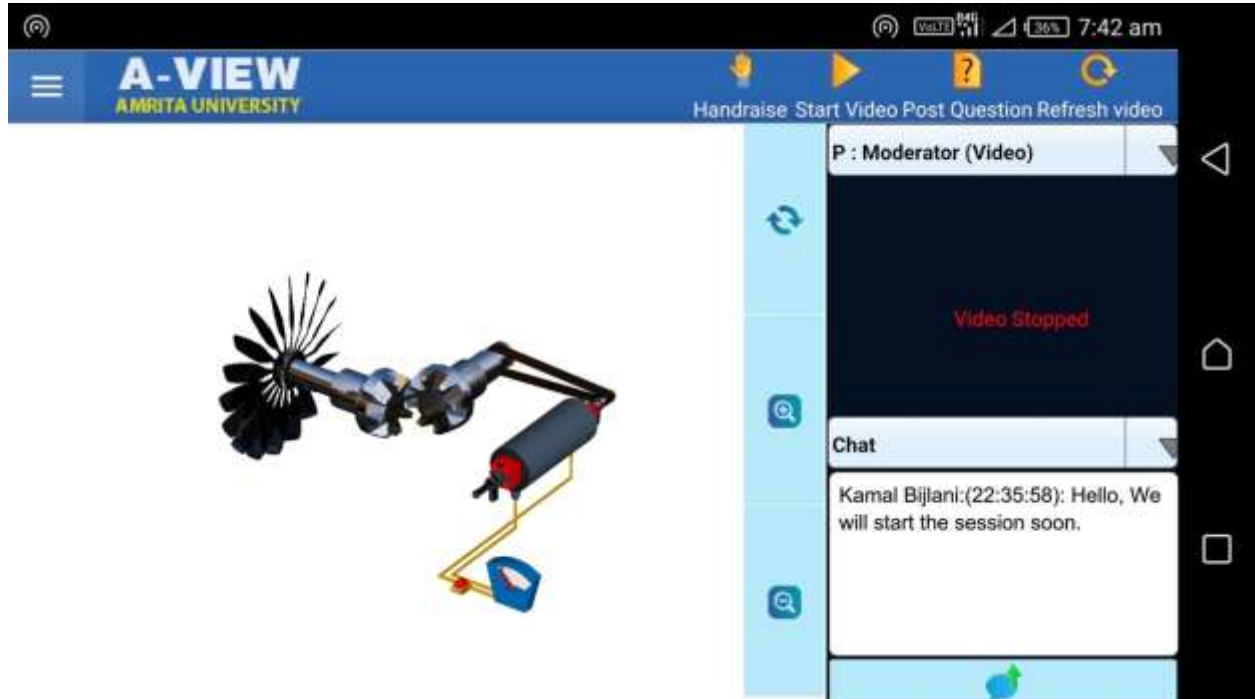

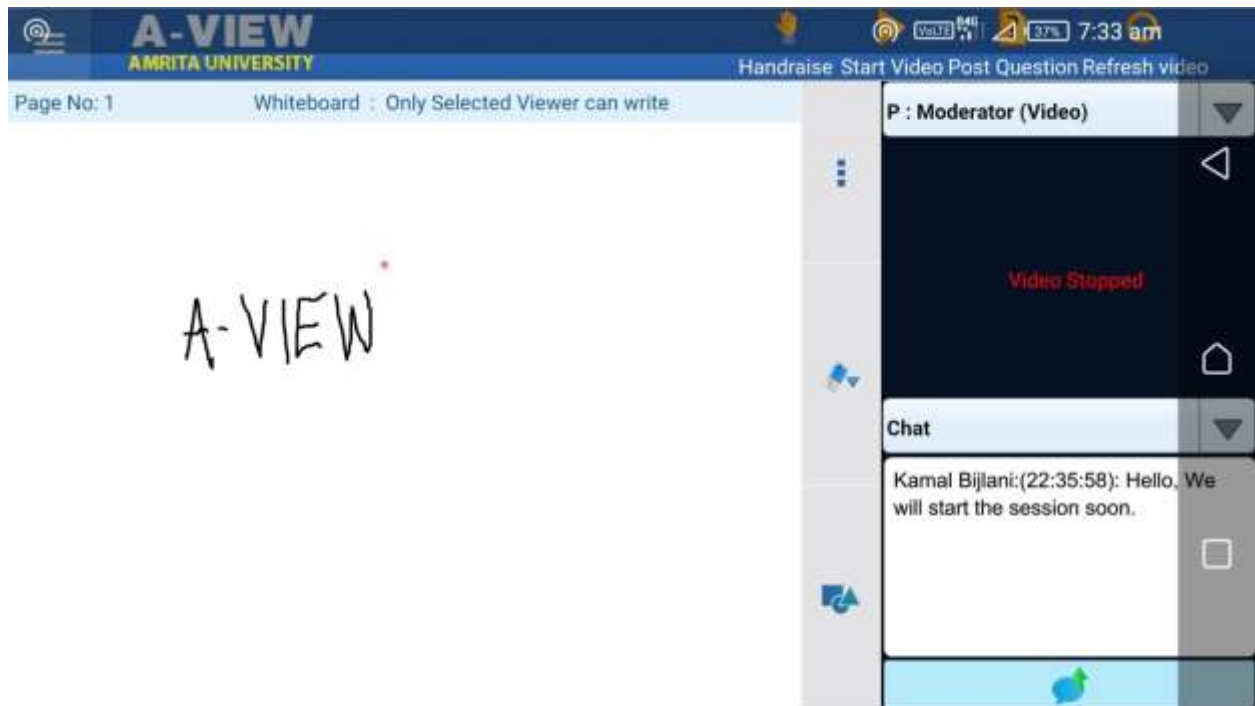

In the next step you can navigate to *My Audio-Video setting* and select your Camera (Primary/Secondary), streaming bit rate (based on your internet speed and preference); recommended rate is 128 kbps (if you have reasonably good bandwidth), keep the default setting if you are not sure.

To interact with the presenter (if you are not selected by the presenter at the moment) you can request interaction by doing handraise on the app. There is also an option to post your questions and refresh the incoming video in case of streaming pauses because of network problems.

Whiteboard & 3D View on Mobile (real time when Presenter writes on whiteboard/3D content).

Mobile user is also connected with the Public Chat.

To exit from the session use the menu bar and select 'Exit session'.
